QUISITIVE

Grants Management Solution

Streamlining Grants. Empowering Your Mission.

Quisitive's Grants Management solution streamlines and enhances the grant making process, from creation to completion. Through greater efficiencies, we allow grantmakers to focus on fulfilling their organization's mission without the complexity of managing the grant process.

Today, institutions choose between grants management packages from one of many off-the-shelf providers, or custom develop an application for their unique needs. Off-the-shelf solutions can be too complex, having far more features than needed. They can also lack the flexibility necessary to adapt to an organization's unique needs and processes. Custom applications can be expensive and require long development cycles.

The Quisitive Difference

Quisitive's Grants Management solution blends the best of both worlds. We marry the best practice business processes found in an online solution with an expert-led exploration of your grantmaking program's unique needs to create a solution that is custom configured for you, and that is ready to deploy quickly.

With our custom-configured Grants Management solution, you can greatly reduce the administrative burden associated with creating, reviewing, verifying, scoring and awarding grants to individuals, businesses or governments. During the lifetime of the grant, this solution continues the post-award administration including contracting, funding and reimbursement, as well as reporting and ongoing progress monitoring.
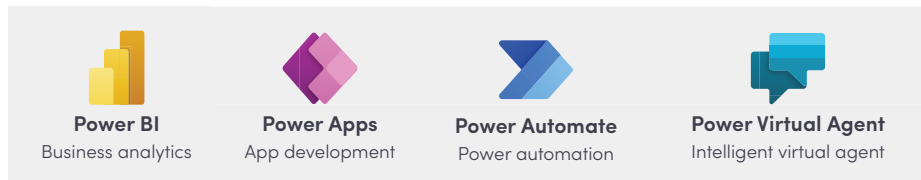

The Grantmaking Cycle

Grant Creation 1
- Grant money is allocated to programs
- Release notice of funding to potential applicants
- Communicate to eligible entities

Application Process 2
- Applicant verifies identity and role
- Completion of grant application
- Internal review of applications

Evaluation & Award 3
- Creation of grant score sheet
- Set up and conduct final review
- Select grant awards

Administration 4
- Assemble and execute contracts
- Grantee submits request for funds
- Money released

Close 5
- Grantee submits close out report
- Formal notification sent to Grantee
- Grant is formally closed

Built on The Power Platform

Our Grant Management solution layers best practice business processes in grants management onto **Microsoft's Power Platform** to provide next-generation productivity improvements. The platform easily integrates with Microsoft solutions such as Office 365. Editing templates in Excel and Word, managing documents across Teams, SharePoint and OneDrive, and creating emails and tasks in Exchange, within the grants management solution, simplifies your team's collaboration. The highly scalable architecture provides unlimited opportunities for future development and enhancement beyond the core grants management functionality.
