

# Application Lifecycle

# Update your applications, architectures & development processes

*Deliver new capabilities. Satisfy changing business needs by prioritizing and delivering your backlog.*

*Migrate your current system to new architecture and platforms that can adapt to changing needs.*

*Extend and integrate across the enterprise. Develop the right architectural strategy with tools and processes for future growth.*

## **Need to Modernize?**

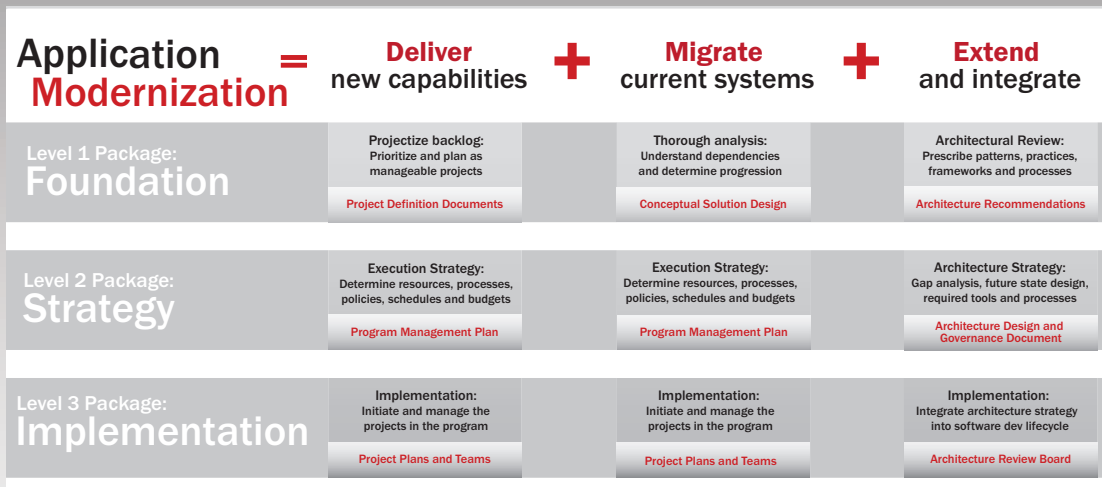

Your enterprise runs on software systems that were built a long time ago. Business processes have changed. New technologies have emerged. But it's difficult to extend and adapt your legacy software.

The pain starts small and grows each year until you find yourself with no apparent way forward. Maybe it's a business analyst trying to get a new series of reports. Then it's a front-line manager trying to integrate processes with a new business partner. Or the COO needs a better view of the overall operation. Meanwhile, the IT organization is torn between cost-effectiveness and the need for agility. The old systems are becoming more expensive and difficult to maintain — and there are fewer people who really understand it all. While the business is screaming for new capabilities, the IT backlog continues to grow while you strive to simply maintain the status quo.

## **We Can Help**

We know your pain. We've heard many clients say, "We know where we need to be, but we don't know how to get there." At Catapult Systems not only do we know what needs to be done, we know how to do it. And we can partner with your IT team to execute a complete modernization strategy. In the end, you'll have optimized, future-proofed software and an educated team that knows how to support it.

- We analyze what you have and where you want to be.
- We develop a roadmap with clear goals and a practical course of action.
- We provide the skills and expertise to build and integrate well-designed systems.
- We protect your current business processes and data integrity.
- We equip you to support the new systems while retaining the intellectual capital in your current team.

### In Closing

The pressure continues to mount on IT organizations take advantage of Catapult's expertise and successful track record. We can tailor our three-level approach to provide just the right amount of help you need to meet the demands of the agile enterprise, both now and in the future.
