## FUSE

### On AWS Test Drive

Fuse is a world-class employee engagement portal built on SharePoint running on AWS. Managed and continuously enhanced by Catapult, Fuse increases engagement 4X more than traditional intranet, enabling usage of SharePoint, Skype for Business and Yammer.

In Test Drive, users can create a demo environment to see how Microsoft technologies can be used successfully within AWS.

- Fully automated build of a virtual Windows machine on AWS, including:
  - Windows Server
  - SharePoint 2013 or 2016
  - Demo Fuse Intranet
- Tour functionality of Fuse
- Review sample content
- Utilize full SharePoint functionality

Available in [Microsoft](#) or [Line of Business](#) Test Drive.

### Key Technologies

**AWS Cloud Ecosystem:** Cloud backup and disaster recovery, security and storage, data center structure, network readiness and cloud applications

**Microsoft Technology Expertise on AWS:** SharePoint, Exchange, Dynamics CRM, Skype for Business, Windows, SQL Server, Team Foundation Server and Systems Center

**Custom Application Development:** MS.Net, JavaScript, Xamarin (Mobile Development), Team Foundation Server (Application Life Cycle Management), NuGet, GitHub and Visual Studio

### Practice Areas

- Cloud Computing Services
- Application Development and System Integration
- Digital Transformation
- Web and Mobile
- Strategic Business Consulting
- Infrastructure
- Managed Services
- Analytics

### What Makes Us Different

- 20+ year history of successful client relationships
- Solutions as a Service focused on cloud services
- Managed services team to support our clients
- Expertise in full lifecycle of IT solutions delivery
- Technology agnostic approach to designing solutions that best meet client needs
- Delivery team focused on customer delight
- Infrastructure, application development and collaboration are equal parts of our business
- Deep Microsoft technology expertise on AWS

### Solutions Sweet Spot

- Migration of Microsoft workloads to AWS
- Fuse Collaboration Portal: Built on SharePoint running on AWS, managed and continuously enhanced by Catapult
- .Net Application On Ramp to AWS
- Cloud solution architecture, using pure cloud, hybrid cloud, or dual cloud based on client needs
- Managed Services: monitoring, management, DevOps, and continuous application deployment

### Clientele Sweet Spot
