

Spyglass: GDPR Assessment

THE CHALLENGE:

With the date of enforcement for EU **General Data Protection Regulation** (GDPR) having passed, it is now more important than ever that companies have a full understanding of its greater impact. Businesses not prepared and compliant with the data protection requirements under GDPR may face significant fines and penalties. Many US businesses are just now realizing that they may be subject to this EU law because the data they hold may include personal data of EU citizens.

Businesses need to determine their readiness for meeting GDPR requirements and gain pragmatic guidance for achieving and maintaining their compliance.

That's where Spyglass comes in.

Catapult's assessment helps you evaluate the readiness and maturity of your organization's people, processes, and technology, as it pertains to GDPR. A security expert helps you gain insight into the requirements and gaps, and provides a roadmap to support your compliance goals.

TYPICAL ASSESSMENT

WHAT YOU GET

1. **A comprehensive review between key stakeholder and Spyglass security experts** to discuss key requirements following Catapult's Four Step Process:
 - a. Discovery
 - b. Workshop and Planning
 - c. Analysis
 - d. Review/Close-out
2. **Walk-through each phase of the assessment** and receive a comprehensive analysis of compliance posture, gaps and recommendations.
3. **Best-practices** and **recommended next steps**, with a roadmap to support compliance goals.

TIMEFRAME & OUTCOMES

- With the support of your key stakeholders, a typical Spyglass GDPR Assessment is completed within 2-3 weeks.
- Results are reviewed with you in person with discussion on potential next steps.
