

Spyglass: Office 365 Security Baseline Assessment

THE CHALLENGE

Clients are looking for ways to evaluate their current security posture. Migrating to Office 365 is a great step toward modern workforce enablement, but often the security dashboards, options and settings, and the abundance of intelligence available within Office 365 can overwhelm IT.

That's where Spyglass comes in.

A security expert inspects your tools, enables security features you may not realize you already own, and identifies those you should own—providing you with a new, meaningful view of your security landscape.

Spyglass produces intelligent views of live activity in your environment over the past 30 days with screenshots of potential issues.

WHAT YOU GET

1. **Guidance on the Microsoft features and tools** that help improve your Office 365 security posture.
2. **A comprehensive review** of your current security and compliance status.
3. **Immediate insight** on risky activities detected within your environment.
4. **Review of best practices and potential next steps** that can ensure your environment is kept secure and compliant.

TIMEFRAME & OUTCOMES

- A typical Spyglass Office 365 Security Baselines Assessment is completed within just a few short days.
- The Spyglass team handles everything. Your team only needs to grant us access to your Office 365 tenant.
- We'll review the results with you in-person and discuss potential next steps.
