

Enterprise Mobility with Windows 8

Catapult Systems employs a personalized approach to ensure that solutions are implemented and configured optimally to address your mobility and organizational needs. As an Enterprise Systems Integrator, Catapult Systems understands the dynamic that Bring Your Own Devices (BYOD) puts in play for IT organizations. Windows 8 provides the Enterprise with a true Enterprise operating system that works on all devices, smartphones, tablets, desktops and laptops with first class support for all types of form factors.

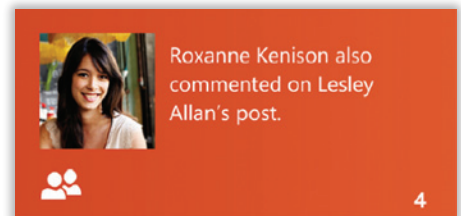

The Catapult Benefit

Catapult's mobile practice develops mobility solutions that span many types of users and scenarios from consumer-focused marketplace applications to enterprise employee applications. Our design sessions focus on four different mobile solution architectures, including a Common Language Framework, helping our clients choose the one that best fits their application and business objectives.

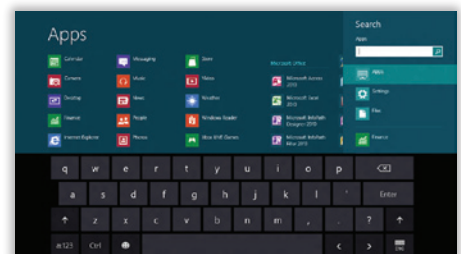

Catapult's Windows 8 developers build and deploy responsive Enterprise applications supported by our user experience practice and Modern UI design. Additionally, our Infrastructure practice helps IT organizations effectively manage all types of devices whether the device is mobile, portable, or a more traditional desktop device.

- *Responsive / Adaptive Application Development Platform*
- *Support for many different types of devices and form factors for different jobs*
- *Touch optimized, fluid user experience*
- *High definition displays*
- *Native HTML5 applications*

- *Live Tiles, glance and go experience*
