

# Power BI for O365 Jumpstart Program

Cloud computing and Business Intelligence as a Service (BlaaS) is rapidly proving too significant for any enterprise to ignore. Determining the perfect strategy and technology to move enterprise data and business intelligence applications to the Cloud, however, can be confusing and sometimes fearful for many business and IT decision makers.

The Catapult Systems Power BI for Office 365 Jumpstart Program is designed to eliminate the confusion, giving companies the ability to “deep-dive” into specific topics and strategies that are deemed as a priority. These innovative jumpstarts include education, alignment, and a targeted pilot program that make it possible for decision makers to learn and experience all of the “as-a-service” business intelligence offerings available.

As part of the Power BI for O365 Jumpstart Program, the education and strategies provided incorporate the Microsoft O365 options and considerations for business intelligence such as security, connecting to on premise data sources, governance, self-service BI, Mobile BI and search.

## Power BI for O365 Jumpstart - Explained

Geared for both business and technical decision makers, the Power BI for O365 Jumpstart is fully customizable to your needs, preferences, and priorities. This includes a concentrated assessment of current systems and applications, best practices, and a targeted pilot solution delivered to the O365 platform.
